

### 9.75m CENTRE COCKPIT CRUISER

The Sea Otter Centre Cockpit Cruiser combines the benefits of a traditional narrow-boat with those of a cruiser. Its narrow beam gives you the freedom of the country's waterways, whilst the central steering position lends itself to comfort and style. By extending the cabins we have been able to provide a superior amount of interior space - the Sea Otter centre cockpit cruiser feels like a much bigger boat.

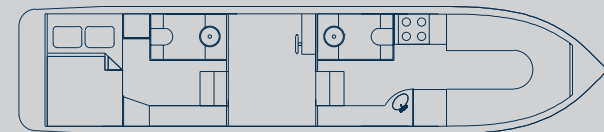

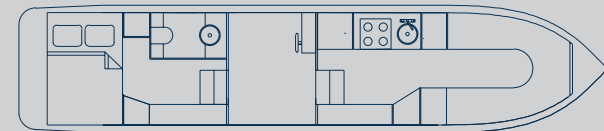

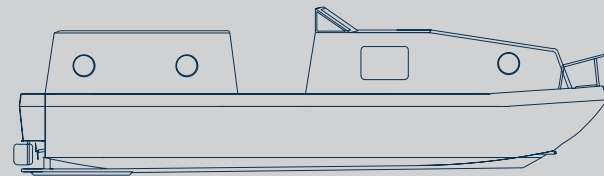

### 6.7m CRUISER

The perfect option for those seeking to enjoy the pleasures of occasional cruising, the new Sea Otter 6.7m cruiser offers an unbelievable amount of space for a boat of its size. Through the clever use of space and by extending the cabin we have been able to include a comprehensive range of facilities including a full galley and optional bathroom with toilet and shower. The twin single berths can also convert into a double.

We are also able to supply a trailer for the 6.7m cruiser which will allow you to tow the boat behind a large family car. Why limit yourself to the same stretch of water when there's literally a whole world of cruising to explore?

▲ The Sea Otter river cruiser is a 6.7m (22ft.) vessel with a 2.1m (6ft.10in.) narrow-beam.

▲ The Sea Otter centre cockpit cruiser is a 9.75m (32ft.) vessel with a 2.1m (6ft.10in.) narrow-beam and a central steering position.

# SEA OTTER ALUMINIUM ALLOY BOAT BUILDERS

INNOVATION...EXCELLENCE...QUALITY

## CRUISERS

www.seaotterboats.co.uk

## ALUMINIUM ALLOY BOATS

You have taken the first step to exploring the many benefits of owning a Sea Otter aluminium alloy cruiser. All Sea Otter craft are constructed of marine grade aluminium alloy, the very same material that is used to build sea going RNLI vessels, fast ferries and trawlers. With a proven lifespan of over 100 years, marine grade aluminium alloy is extremely resistant to corrosion, is strong and durable and more than a match for the rigours of the inland waterways and sea going cruising. We have so much confidence in the aluminium alloy that we offer a lifetime hull warranty with every one of our boats.

Owning your Sea Otter means enjoying hours of leisurely cruising and not hours of hard work on hull maintenance.

## AWARD WINNING BUILDERS

The benefits and pleasures of owning a Sea Otter go much further than the high quality of materials used in construction. When you buy a Sea Otter you are buying into the future. By applying the considerable skills and experience gained

in building sea-going vessels we have, over the years, designed and developed a revolutionary craft. Every Sea Otter combines the technology and materials of today with the traditional skills and crafts of yesteryear. With our unique blend of technology and tradition, our emphasis on quality and our professional after-sales care, Sea Otter have claimed all of the industry's most coveted awards including the Lionel Munk Trophy, the Marion Munk Rose Bowl, the Calor Rose Bowl and Waterscape awards for most innovative waterside business & best boating business. Most recently, Sea Otter claimed the celebrated John Beadsmore award for excellence in broad beam boat building. Sea Otter cruisers represent just the latest in our long history of award-winning innovation and design.

## FEATURES

Luxurious comfort, innovative design, quality, durability and easy maintenance are uppermost in our minds when we fit the interior of your Sea Otter. Hand crafted interiors of American white ash with hardwood trims and capping present elegant lines and surfaces to enhance the spacious feel. Throughout the boat your personal preference for carpets, upholstery and curtains are included as standard from a selection of fabulous colours and designs.

Classic design and reflective surfaces with discreet lighting provide a clean and contemporary flavour, with streamlined and fully equipped galleys, incorporating comprehensive cooking and refrigeration facilities as standard. The one-piece granite effect worktop completes the galley area. A comprehensively fitted bathroom with full shower, hand basin and toilet complete the domestic facilities. All cabins are fully insulated for year round cruising comfort.

Just like the rest of our boats, the furniture is made by skilled artisans in house to ensure perfect continuity throughout. Creating the furniture off the boat, and fitting it later ensures a more precise

build. Components such as the kitchen sink are also moulded on site in purpose built facilities.

Each Sea Otter boat is individually hand crafted, providing the customer with the opportunity to select from a choice of tried and tested layouts included in the standard Sea Otter range.

Across the range a proven, reliable, and economical inboard marine diesel engine provides ample power for your Sea Otter in all conditions. Firmly mounted in the engine room compartment, you can enjoy the peace of the waterways with minimal engine noise. Meanwhile, the underwater design and unique Sea Otter water ballast system combine to deliver unrivalled handling characteristics, tight turning circle and great stability. Whether you are experienced or new to boat handling, you will find that the responsive controls of your Sea Otter make boating relaxing & effortless and lend you an instant confidence.

A Sea Otter can be finished in any colour you wish and, for that final personal touch, we will add hand-painted coachlines and sign writing to your specifications. Whatever you choose, the superb finish provided will be to the highest possible standards and look good for many years to come.
